

Your **Cycling** Connection

Learn2Ride Online Social Kit

Thank you for helping us spread the word about HUB Cycling's Learn2Ride Online Course!

Program Description:

Learn2Ride Online is a free, web-based online course that helps youth ages 9-12 yrs learn about basic cycling safety. This online course is based on [HUB Cycling's Learn2Ride program](#) (PDF), a school based in-person course that has been completed by over 25,000 Metro Vancouver students. With in-school learning looking very different in 2020, Learn2Ride Online helps families learn skills to cycle safely and confidently around their neighbourhood.

The Learn2Ride Online course is hosted on the popular education platform, Moodle. The course has been developed in collaboration with [TransLink](#) and the [Ministry of Transportation and Infrastructure](#).

Designed for those 9-12 years old, it covers:

- Parts of the Bicycle
- ABC Quick Check
- Locking a Bicycle
- Helmet and Safety Gear
- ABCs of Bike Safety: Awareness, Behaviour & Communication

It can be completed at home, at any time, from any computer or device with an internet connection. The content has been kept straightforward and interactive in hopes of being a self-guided resource for young cyclists. Some of the activities in the course include a Spot the Differences game teaching bike safety gear, and a Memory Game for road signs. It has been designed with a Grade 4-5 audience in mind, although we believe it could extend to older audiences up to Grade 7 and other beginner riders.

Parents of young cyclists can find information on how to register their child [here](#).

Teachers interested in enrolling their class can contact us at schools@bikehub.ca for group enrollment.
